

# Acoustic Door Set

ACOUSTIC DOORS

**A range of custom-made, fire-rated and non-fire-rated acoustic doors.**

ARA Manufacture can produce a large range of single and double acoustic door sets under licence from Pyropanel.

## OVERVIEW

Constructed from both timber and metal, each door can be custom finished with your choice of decorative veneers or laminates including ARA's own extra thick veneer system, Stablewood. Stablewood is 150mm strips cut out of block-form timber of the desired species of timber. Each strip is typically a minimum of 3mm thick allowing owners to sand and re-coat the timber for years to come.

ARA Manufacture can also pre-machine hardware requirements into the door leaf such as mortise lock prep or bottom seals. Specialised hardware configurations can also be arranged and installed.

## APPLICATIONS

ARA Manufacture's range of acoustic doors suit industrial exits requiring strong protection from fire.
