

# Attack Resistant Glass

WINDOWS AND GLASS

## Toughened glass clad polycarbonate to withstand deliberate breakage.

ARA Manufacture's BSA Attack resistant glass is designed to withstand deliberate breakage, escape and or entry. Designed to meet client's specific needs, BSA Attack resistant glass is made from toughened glass clad polycarbonate.

### OVERVIEW

Used in any situation requiring resistance to attack, breakage, escape or entry, BSA Attack resistant glass can be manufactured to your specific needs. With a low to extreme resistance range, our glass can be applied to protect commercial valuables such as jewellery stores through to securing high security super maximum prisons.

All standard products are available in performance enhancing glass such as solar, low iron, toned and patterned, and are available with a "Spall or Sacrificial" film, for additional protection.

Tested Australia-wide by IAT, correctional teams and TRG (videos available).

### APPLICATIONS

ARA Manufacture's BSA Attack resistant glass is designed to be used in any situation that requires resistance to attack, breakage, escape or entry – from jewellery stores to high security super maximum prisons.
