

# Bespoke Vertical Sliding Door

## SLIDING DOORS

### An easy-to-use counterweighted custom sliding door.

ARA Manufacture's bespoke vertical sliding door is custom-made and available in custom sizes and a range of cladding options.

#### OVERVIEW

This bespoke vertical sliding door can be designed to suit various applications and, like all Monarch Renlita doors, it can be custom-made to operate manually or motorised.

The vertical sliding door can be made to suit your requirements but requires maximum headroom.

#### APPLICATIONS

ARA Manufacture's bespoke vertical sliding door can be custom-made to any application.

#### SIZE

Custom-made – please consult our sales team.

#### DESIGN

- **Operation:**  
Designed for manual operation or motorised.
- **Anti-fall brake:**  
Monarch Renlita has incorporated an optional, new safety feature to the counterweight door range. Through innovative design and extensive in-house testing, we have developed and patented the anti-fall brake. Our counterweight doors are designed with a safety factor of 6 to 1 and the new anti-fall brake increases this measure.
