

# Clearfold Frameless Glass Door

HORIZONTAL FOLDING DOORS

**Bring the natural light in and complement your architecture.**

ARA Manufacture's Clearfold frameless glass door is a sophisticated design that showcases your business and take full advantage of natural light.

## OVERVIEW

The Clearfold frameless glass door glides smoothly along an overhead track which is tucked neatly away in the ceiling. The door's ingenious operation eliminates the need for a floor track, while its hinges are specifically designed to allow the door to follow an overhead curved path.

Constructed from 10, 12 or 15mm toughened glass panels, this door is motorised using our exclusive logic control system. This door doesn't 'stack' until it reaches the bifurcated portion of the track, allowing maximum use of your floor space. The use of our motorised system eliminates WHS issues that can occur with manual operation, reducing the risk of product misuse and damage.

Manual operation is optional depending on size. This exclusive trace and drive system can be incorporated for use with door panels of your choice.

## APPLICATIONS

ARA Manufacture's Clearfold frameless glass door suits many commercial large openings including:

- Shopping centres
- Restaurants
- Clubs and function centres
- Entertainment centres

## DESIGN

- **Locking:** Main curtain locked to floor. Access doors provided with Lockwood lock.
- **Tracks:** 3-part extruded aluminium. 125mm x 105mm incorporating track and pelmet to conceal door drive.
- **Curtain:** Door panels constructed from 10, 12 or 15mm toughened glass with 118mm x 40mm aluminium top and bottom rails.

## SIZE

Maximum width – endless Maximum height – 4 metres

## FINISH

Track, top and bottom rails available in powder-coated or anodised finish.
