

# Custom Security Doors Fabricated to Specification

HIGH SECURITY DOORS

## Aesthetically appealing bespoke garage door solutions to suit any home.

ARA Manufacture's bespoke horizontal sliding door is custom-made and available in any size and a range of quality options.

### OVERVIEW

ARA Manufacture can manufacture a security door to any project specifications. Whether your application requires ballistic, blast, bullet or attack ratings, we can manufacture it! We can also include any door hardware, automation and access control solutions to suit your project.

### CASE STUDY

In our ever-changing global environment, the demand for bullet-resistant doors is moving away from traditional markets and industries, with ARA Manufacture pioneering this shift, installing an intruder and ballistic rated door set at a leading school in Adelaide, South Australia.

The ordinary looking door (pictured right) that does extraordinary things; an FEBR (G2) Intruder and G2 Ballistic Rated Door set featuring bullet resistant materials, with one way mirror vision panel was installed at the Adelaide school to create a safe haven for staff and students to gather in response to any threats to safety.

Strong and robust, the intruder-resistant door contains galvanised steel within the door frame, promising the ultimate in security. At the same time, custom made, optional finishes enable the door set to be tailored both physically and aesthetically, promising the most discreet installation for a range of diverse industries. Humble, yet highly secure. ARA Manufacture is paving the way for educational facilities
