

# Oriental Door

## HORIZONTAL FOLDING DOORS

### Ergonomically designed to maximise space.

ARA Manufacture's Oriental door is ideal for applications where limited headroom is available and can be fitted to curved openings.

### OVERVIEW

A concertina design, the Oriental door is side folding, and offers adaptability and functionality that is well-suited to a range of commercial applications.

Ergonomically designed to make the most of your space, this door opens in a concertina-like fashion and stacks away neatly, without the need of a floor track.

### APPLICATIONS

ARA Manufacture's Oriental door suits many residential and large commercial spaces including:

- Airport terminals
- Shopping centres
- Restaurants
- Clubs and function centres
- Entertainment centres

### DESIGN

- **Locking:** Locking stiles (50mm x 32mm) to be provided with cylinder locks operable from both sides.
- **Tracks:** Extruded aluminium 36mm x 40mm. Curved tracks available with minimum radii for smooth operation. (Minimum radii for 150 model is 300mm, minimum radii for 300 model is 600mm).
- **Curtain:** Oriental 150 incorporates 150mm wide x 120mm high solid aluminium panels at the top and base whilst the Oriental 300 incorporates 300mm wide by 120mm high at the top and base.

### SIZE

Maximum width – endless panels (each panel maximum 950mm wide) Maximum height – 3 metres

### FINISH

Available in a range of contours, lengths and colours.
