

Porta Nero Door

HYBRID DOORS

The perfect combination of lightweight, but robust steel frames to create a luxurious appearance.

ARA Manufacture's Monarch Renlita has created this latest door that is ready to rival white French doors as an instant classic.

OVERVIEW

Porta Nero, Italian for 'black door', is the new must-have statement piece for the home.

The steel frame requires much less maintenance than wood and is three times stronger than aluminium, making it perfect for projects that require a sturdy door without compromising on elegance.

These stunning doors are custom-designed and manufactured to meet your requirements, whether you require single or double folding doors, sliding doors and bi-folds, or stacking and pivoting doors.

APPLICATIONS

ARA Manufacture's new Porta Nero door is an aesthetically designed door suitable for residential bathrooms, kitchens, major feature windows or doors. It can also be used for commercial premises such as offices and restaurants. Note: Porta Nero is not recommended for outdoors use.

SPECIFICATIONS

- **Lock:** Lockwood lock
- **Hinge:** Options include a pivot hinge, continuous hinger and butt hinge. Other hinge options may be achievable depending on application.
- **Size:** All doors are made to order
- **Finish:** Black powder coat
