

# Sealeck 15 Series

WINDOWS AND GLASS

## Square and rectangular vision panels to suit low level bio-containment doors.

ARA Manufacture's Sealeck 15 Series glass vision panels are custom made and glass is fixed centrally to suit the requirements of your low to medium PC2 or PC3 bio-containment door.

### OVERVIEW

Custom made in square or rectangular shapes, these laminated safety glass vision panels can be up to 12mm thick and include a light to medium duty frame to suit door leaf thicknesses from 35-42mm. The frame can be powder-coated to match the door colour and is screw fixed on one side only to enable a clean and secure face on the other.

### APPLICATIONS

ARA Manufacture's vision panels are suitable for low and some medium level bio-containment doors (PC2 and some PC3).

### SPECIFICATIONS

**Glass thickness:** 6.38mm up to 12mm

**Door leaf thickness:** 35mm to 42mm

**Frame:** Sealed to the door surface and matched with two (one per side) galvabond or galvanneal steel (powder-coated), or 304 (316) grade stainless steel.

**Fixings:** Countersunk Allen head fixings to non-critical side only to allow clean secure side without fixings. Fixing holes to non-critical side can be provided with optional plastic plugs/covers.
