

# Securaguard Type B Tray

HIGH SECURITY PASS THROUGH UNITS

## A larger square tray with a hinged lid for objects to be safely passed beneath the window.

ARA Manufacture's Sealeck Securaguard Type B tray is a deeper tray for exchanging larger objects such as EFTPOS machines, money bags, and large envelopes. To move items beneath the window, staff lift a hinged clear plastic lid and rolls/slides the two-part lid away from the customer.

### OVERVIEW

Made from 3mm stainless steel 304 #4 finish casing, the Sealeck Securaguard Type B tray is lined with a black plastic moulded insert for sound absorption when coins are placed into the tray.

The tray is designed to fit flush with joinery bench tops and is suitable for G0, G1, G2, and R1/S1 bullet ratings to AS2343: 1984.

### APPLICATIONS

ARA Manufacture's Sealeck Securaguard Type B tray can be used by companies that operate in high threat level areas requiring secure item and document transfer.

### SPECIFICATIONS

**Size:** Standard size is 686mm long x 450mm wide x 147mm deep.
