

Securaguard Type D Tray

HIGH SECURITY PASS THROUGH UNITS

The safe transfer of cash register trays beneath the counter.

ARA Manufacture's Sealeck Securaguard Type D tray is specifically designed to allow the safe transfer of cash register trays.

OVERVIEW

ARA Manufacture's Sealeck Securaguard Type D tray is specifically designed to allow the safe transfer of cash register trays. To move the cash register trays beneath the counter surface, staff open the lid on one side of the window or partition while the recipient removes it by opening the lid on the other side.

Made from 3mm stainless steel 304 #4 finish casing, the Sealeck Securaguard Type D tray has clear perspex lids on both sides of the unit with one locking lid to control the removal of items being passed through. An extra locking lid to the other side is optional.

The tray is designed to fit flush with joinery bench tops and is suitable for G0, G1, G2, and R1/S1 bullet ratings to AS2343: 1984.

APPLICATIONS

ARA Manufacture's Sealeck Securaguard Type D tray can be used by companies that operate in high threat level areas requiring secure daily cash tray transfer.
