

# Security Roller Grille

ROLLING DOORS

**An attractive solution for applications that require a secure barrier and airflow.**

ARA Manufacture's Security roller grille provides the perfect design blending security with unimpeded visibility and airflow.

## OVERVIEW

The Security grille's popular brick pattern is constructed from aluminium tubing for full width opening connected with moulded nylon links, providing a secure operable curtain.

This grille is ideal for applications that require a secure barrier against theft and debris, and where visual access, light infiltration and aesthetics are also a key design consideration.

## APPLICATIONS

ARA Manufacture's Security roller grille is recommended for wide range of commercial uses including:

- Shopping centre
- Shop fronts
- Bar tops
- Counter tops
- Doorways
- Bottle shops
- Sports complexes
- Arcades
- Clubs

## DESIGN

- **Operation:** All doors are counterbalanced per manual operation. Motorisation is optional and is recommended for wide and/or high openings.
- **Locking:** Centrally mounted, two-way mortise key lock or sliding shoot bolt (for manual doors).
- **Bottom rail:** 90mm x 48mm extruded aluminium sections.
- **Side guide:** 50m x 33mm extruded aluminium with false back for concealing fixings. Optional Schlegel buffer available.
- **Mullions:** One-piece extrusion for straight openings, adjustable two-piece sections.

## SIZE

Maximum width – 3.6 metres Maximum height – 3.6 metres

## FINISH

Anodised and powder-coated colours available.
