

# Slimline Roller Shutter

ROLLING DOORS

## The ideal small aperture shutter.

ARA Manufacture's Slimline roller shutter suits a variety of commercial uses and offer strength, durability and style.

### OVERVIEW

The Slimline roller shutter is designed with security in mind. Featuring a large range of options, the Slimline shutter can be custom-made to your specifications.

### APPLICATIONS

ARA Manufacture's Slimline roller shutter is recommended for use in a variety of commercial areas and small applications including:

- Bar tops
- Counter tops
- Doorways
- Clubs
- Fire hydrants
- Sports complexes

### DESIGN

- **Operation:** All doors are counterbalanced per manual operation and motorisation is optional. This is recommended for wide and/or high openings.
- **Locking:** Two-way mortise key lock or sliding shoot bolt locking mounted within the bottom rail (for manual doors).
- **Curtain:** Extruded aluminium slats with a face depth of 42 x 1.5mm slimline.
- **Side guide:** 37mm x 25mm extruded aluminium channel incorporating optional Schlegel infill.
- **Roller drum:** 100mm or 150mm spiral ducted tube attached to ball bearing drum wheels rotating on a 34mm steel shaft.
- **Brackets:** 90mm x 40mm mild steel.

### SIZE

Maximum width – 2.4 metres Maximum height – 3 metres

### FINISH

Available in powder-coated or anodised colours
