

Dual Lock Handle Control Emergency Release

DLHC-ER-UDA

OVERVIEW

DLHC-ER-UDA (Dual Lock Handle Control - Emergency Release- Under Door Attack - Non Fire Rated)
DLHC-ER-UDA-FR (Dual Lock Handle Control - Emergency Release- Under Door Attack - Fire Rated)

Upon activating the push button, both primary and secondary locks can be operated with a single downward motion of the primary door lever. Without activating the push button, the top bolt will not retract, keeping the door secure and preventing under door attack.

This innovative all in one design comes with colour indicators for both the release button and turn snib to indicate locked (red) or unlocked (green).

The DLHC-ER-UDA is also available in a retrofit version for easy replacement of existing door hardware.

DOOR SUITABILITY

- Available for both left and right hand doors
- High security buildings
- External exit doors
- Airports
- Commercial office areas
- High quality brass
- Fire rated (FR)

FIRE RATING

Fire rated up to 240 minutes
