

Dual Lock Plate 33

DLP-33 (TD & SD)

OVERVIEW

The Dual Lock Plate 33 is a lock cover suitable for timber (DLP-33-TD) and metal (DLP-33-SD) double door sets. The DLP-33 is used in conjunction with the MLMF 33 adjustable strike (sold separately for inactive leaf) to provide a complete security package.

The DLP-33 correctly sets the lock spacings to suit a dual lock handle control (DLHC) and provides additional protection to the lock body for physical security and natural weather conditions.

DOOR SUITABILITY

- DLP 33- TD: Suitable for 48-50mm thick timber doors
- DLP 33- SD: 50mm thick metal doors
- Installed into active leaf
- Ensures lock spacing is correctly set to suit a dual lock handle
- Suitable for left or right hand doors
- Manufactured from 316 stainless steel
