

Multilock Strike Shield 500

MSS-500

OVERVIEW

The Multi Strike Shield 500 (**MSS-500**) is designed to protect and secure a single lock from being tampered. The **MSS-500** can be interlocked with the **MLB-50** (sold separately) to provide additional protection to the lock body for physical security and natural weather conditions.

The **MSS-500** face plate is placed on the leading edge of the door with the door side mount plate placed to the door face. It can be surface mounted or recessed into the door. An additional door side packing plate is supplied for assistance with installation when lock centres are off set allowing extra adjustment if required. It is critical that the lock tongue back set is measured and marked prior to cut-outs. This allows for correct lock operation and latching.

DOOR SUITABILITY

- MSS 500 is used for single lock configuration
- Suitable for minimum 45mm thick doors
- Manufactured from 316 stainless steel

FIRE RATING

Fire rated up to 240 minutes
