

Locker locks range

Padlock hasp

The padlock hasp is a cam locker lock secured by an external padlock. Our padlock hasp fits padlocks with a shackle diameter of 8mm and features an anti-rotation system to prevent threading when in the locked position. Padlocks sold separately.

SPECIFICATIONS

Type: Mechanical
 Mode: Dedicated / Shared
 Door thickness: 1 mm - 22 mm

Padlock not included.
 Padlocks are available separately through Lockin
