### Information on Woven Image's Take Back Program:

1. Woven Image will take back all uncontaminated Woven Image textiles, Mura and unlaminated EchoPanel® product, including material disassembled from workstations and chairs. This also includes off-cuts.
2. 'Uncontaminated' refers to end of life or residual (off cuts and used) textiles and materials where there is nothing on or stuck to the product to make it impure or 'contaminated' in the recycling process. Examples of potential recycling contaminants generally include adhesives, toxic substances, finishes, coatings and any other additive or material that compromises the recycling of the textiles and EchoPanel®.
3. Unless otherwise negotiated, the customer is responsible for freighting the product to Woven Image at the specified address above.
4. Product must be bagged in approved bags or the provided Woven Image bags. They are to be correctly sorted into Wools or Polyesters (for textiles), or EchoPanel® product with this return form attached. For additional information please contact 1800 888 650 or email [info@wovenimage.com](mailto:info@wovenimage.com).
